

Practica 1

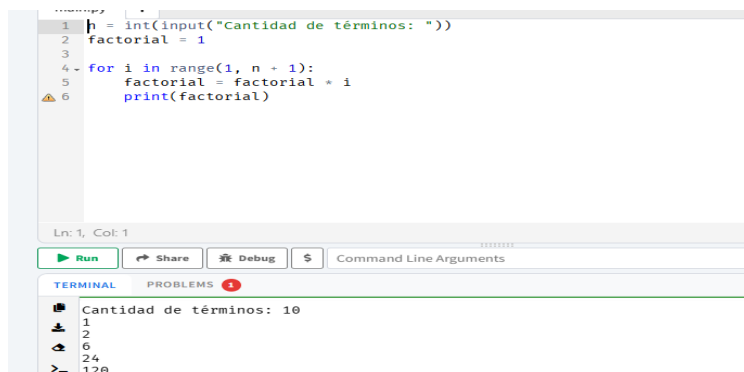

The screenshot shows the online-python.com interface. The code editor contains a file named `main.py` with the following Python code:

```
1 n = int(input("Ingrese n: "))
2 suma = 0
3
4 for i in range(1, n + 1):
5     suma = suma + (i / (i ** 2))
6
7 print("La suma es:", suma)
```

The status bar indicates the cursor is at Line 7, Column 27. Below the editor are buttons for `Run`, `Share`, `Debug`, and `Command Line Arguments`. The `TERMINAL` tab is active, showing the output of the program:

```
Ingrese n: 4
La suma es: 2.0833333333333333
```

Practica 2

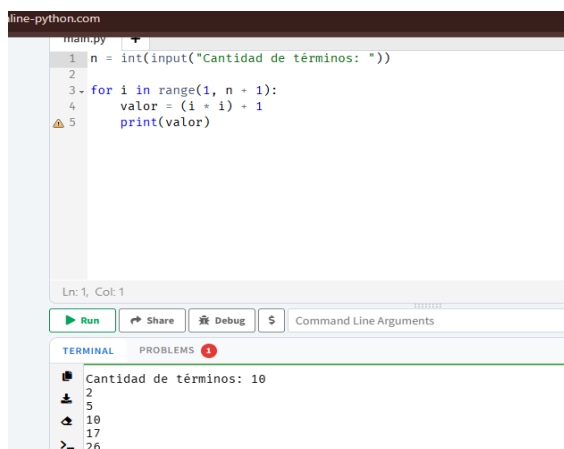

The screenshot shows the online-python.com interface. The code editor contains a file named `main.py` with the following Python code:

```
1 n = int(input("Cantidad de términos: "))
2 factorial = 1
3
4 for i in range(1, n + 1):
5     factorial = factorial * i
6 print(factorial)
```

The status bar indicates the cursor is at Line 1, Column 1. Below the editor are buttons for `Run`, `Share`, `Debug`, and `Command Line Arguments`. The `TERMINAL` tab is active, showing the output of the program:

```
Cantidad de términos: 10
1
2
6
24
120
```

Practica 3

The screenshot shows the online-python.com interface. The code editor contains a file named `main.py` with the following Python code:

```
1 n = int(input("Cantidad de términos: "))
2
3 for i in range(1, n + 1):
4     valor = (i * i) + 1
5 print(valor)
```

The status bar indicates the cursor is at Line 1, Column 1. Below the editor are buttons for `Run`, `Share`, `Debug`, and `Command Line Arguments`. The `TERMINAL` tab is active, showing the output of the program:

```
Cantidad de términos: 10
2
5
10
17
26
```

Práctica 4

```
1 n = int(input("Cantidad de términos: "))
2
3 valor = 2
4 incremento = 1
5
6 for i in range(n):
7     print(valor)
8     incremento = incremento + 1
9     valor = valor + incremento
```
